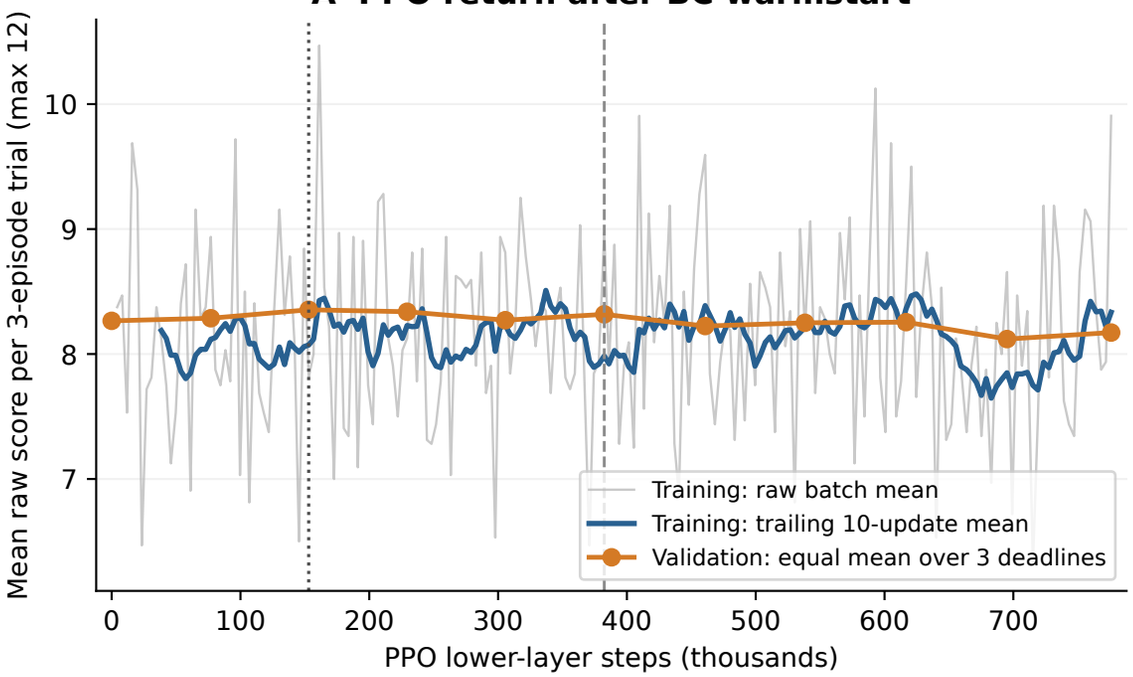
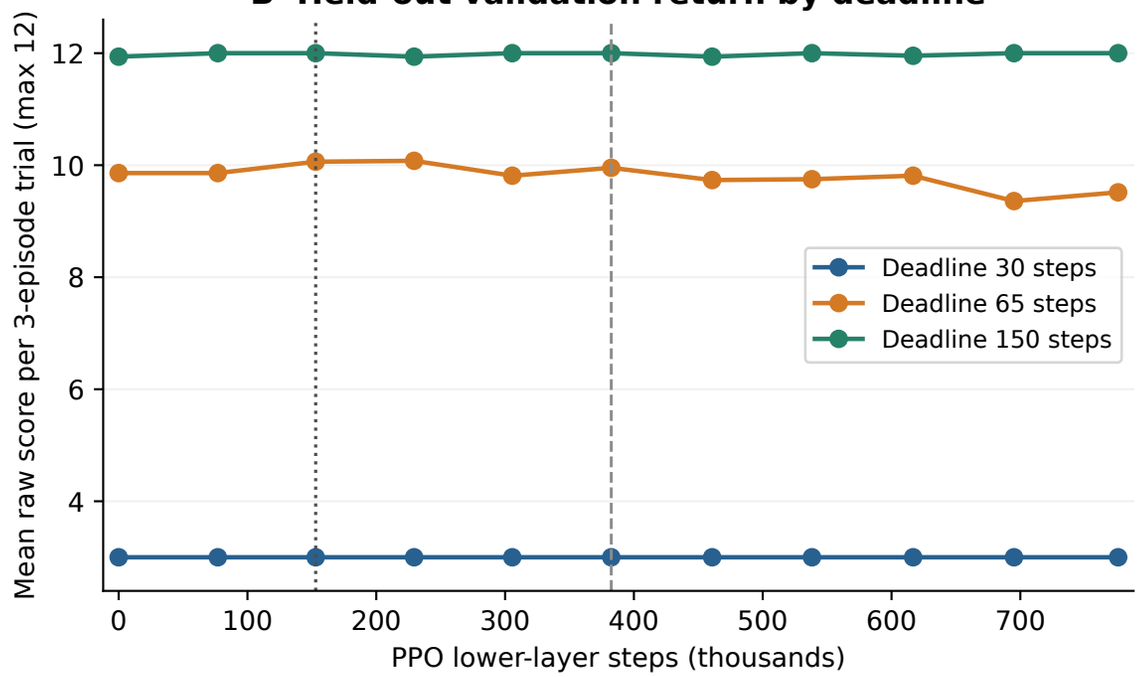
Pick-Place | fixed outer scores {0, 1, 2, 4} | seed 0

1000 BC updates, then 200 PPO updates (775,917 lower-layer steps); ideal lower controller

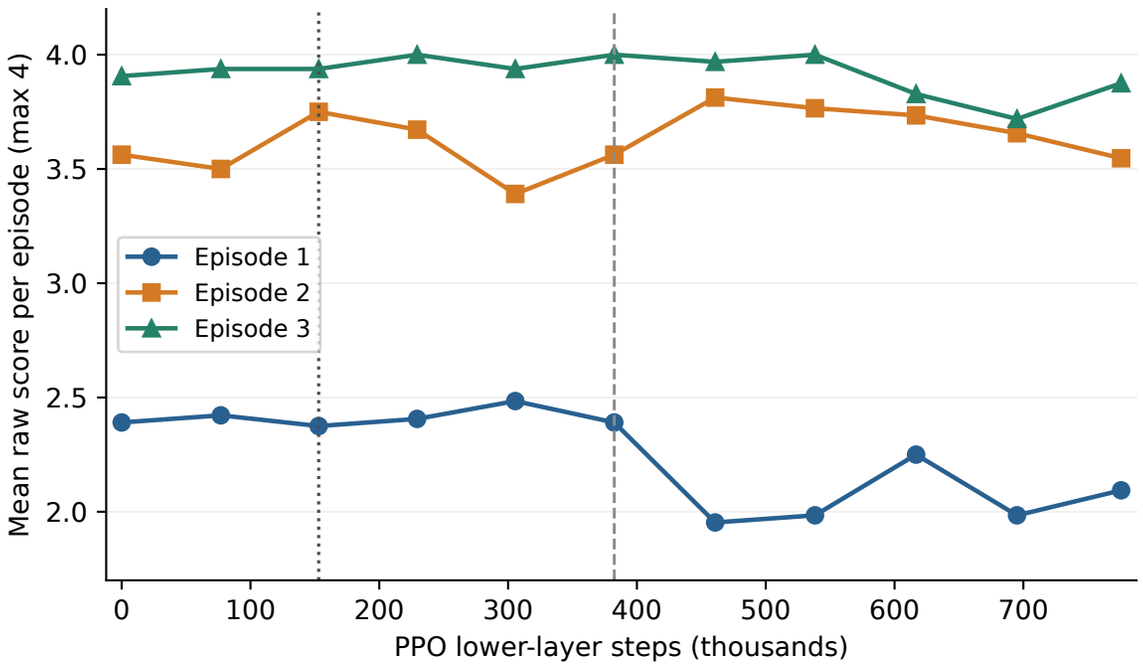
A PPO return after BC warmstart



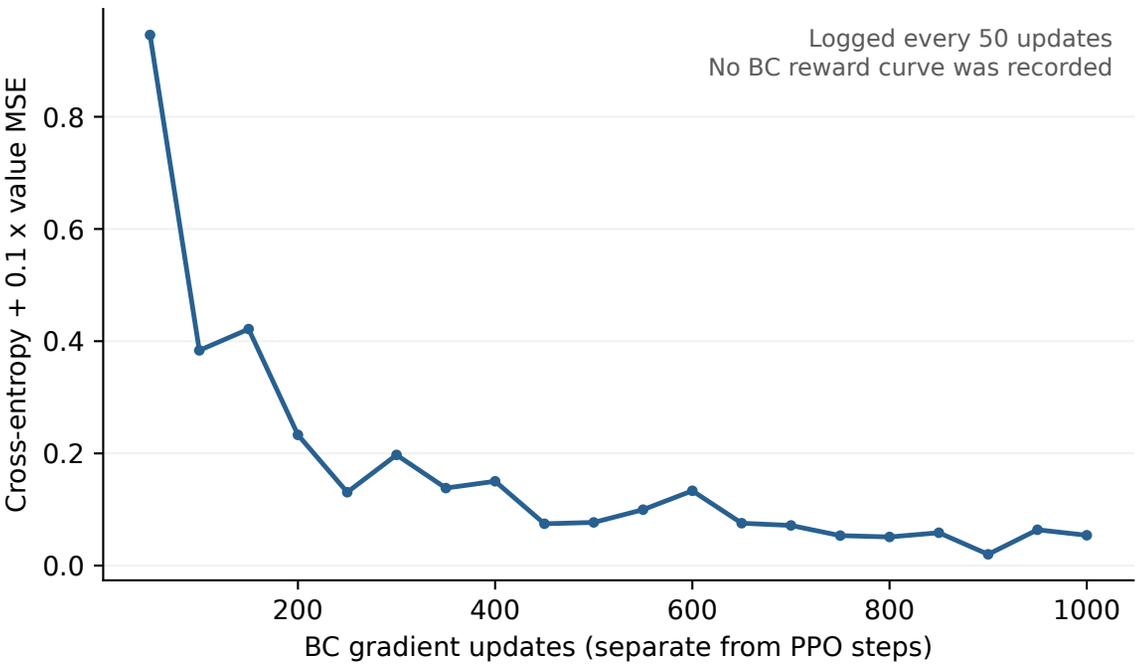
B Held-out validation return by deadline



C Deadline 65: validation score across episodes



D BC warmstart: recorded minibatch loss



Dotted line: validation-selected checkpoint (PPO update 40, 152,964 steps). Dashed line: BC auxiliary reaches zero (update 100).

Source: fixed_score_set_seed0/training.csv, validation_*.json, after_bc_validation.json and run log. Validation: 64 trials/deadline; single training seed; no confidence bands.
